## The Next Generation of RX Hygienic Hose Assemblies

Lighter and stronger to *last longer*

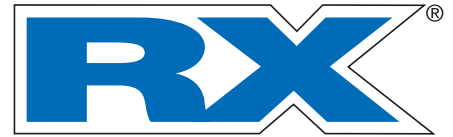

**RX**<sup>®</sup>

Lighter by  
**50%**

Stronger by  
**10%**

An **ERIKS** Company

## Why choose the next generation of RX hose from FHS?

### ■ Over 10% Stronger

- Up to 18 bar working pressure
- Odourless and tasteless inner liner
- Resistant to all commercial cleaning products
- Animal and vegetable fat resistant, durable outside wall
- Complies to FDA, BfR

### ■ Lighter by 50%

- More flexible for easier handling

### ■ Lasts longer than conventional 'Lite' hose

- Due to unique spiral construction
- New mirror like homogenous liner compound for use with revised connectors

### ■ All assemblies hydrostatic tested

- To 1.5 times the working pressure
- For your safety and peace of mind

### ■ Hose marking/engraving

- Each individual hose assembly is marked with a unique reference number for 31B traceability, test pressure and date of manufacture
- Bespoke marking options available

### ■ Next generation

- Totally free from phthalates and plasticisers
- 'ADI-free' Animal Derived Ingredients free
- Colour coded assemblies

## RX hose systems help reduce bacteria risk

Three key aspects combine to help stop bacteria problems.

1. End connections specifically designed to remove all bug traps
2. New tougher liner compounds unique to RX resist nicks and imperfections
3. Dedicated hygienic production cell minimises contamination

*RX hygienic rubber hoses are inspected for the use of ingredients originating from animals in order to avoid the risk of BSE prion contamination*
