## Food Grade Hose for Meat Free Food

RX Alifixx replaces steel braided hose

### ISSUE

A large producer of healthy meat alternative foods were having an issue with a flexible steel braided hose. In order to offset the pipe connections, the hose was being bent into a loop to bridge the gap between the food lines. The steel braiding, bent beyond its limit, was creating a Health and Safety risk for workers, who might catch themselves on the sharp steel. In addition the loop was causing a reduction in pipe size resulting in a reduction in product flow.

### SOLUTION

ERIKS Industrial Hose recommended RX Alifixx with custom designed fittings to enable a larger bore. This FDA approved food grade hose allows for greater flexibility than regular hose. The result is a superior hose with increased flexibility allowing for maximised product flow.

### OTHER BENEFITS

- Increase in flexibility allowing for maximised product flow
- Eliminated Health and Safety issue from punctured metal hose

### FURTHER COMMENTS...

The customer was very pleased with the ERIKS solution, it solved their H&S risk, increased product flow and satisfied food hygiene regulations all at once.
