

Flexible

Reach the
unreachable!

THE ONLY MULTI-USE
PRODUCT WITH A
FLEXIBLE STRAW

- Drives out moisture
- Stops squeaks
- Loosens rusted parts
- Cleans & protects
- Frees sticky mechanisms

Let's make industry work better

ERIKS

Just when you thought that WD-40 Multi-Use Product was the best it could be...

Introducing new WD-40 Flexible, with a super bendy, flexible metal straw that can be shaped to cope with every angle, corner, unseen target and difficult-to-reach area you can imagine.

Whilst our Smart Straw allows users to target very specific areas, our metal flexible straw gives you an even more convenient delivery system, holding whatever shape it is bent into to allow application in incredibly tight, intricate spaces such as around pipework and behind panels.

And of course, with our Sprays2Ways technology, you still have the option to flip down the straw and apply a wide spray to areas needing maximum coverage.

...It Just Got Better

- Long metal straw (185mm) that can be bent and flexed to reach difficult target areas
- Flexible straw will hold the shape it is moulded to, so you can still spray one-handed
- Allows you to work around obstacles such as pipework, paneling and large components
- Taller, thinner 400ml can allows for a longer straw, almost 1/3 longer than the Smart Straw
- Spray2Ways valve still allows for wide application, just flick the straw down and spray

REMEMBER, IT IS STILL **WD-40** MULTI-USE PRODUCT, SO YOU CAN USE IT FOR:

- Displacing moisture, preventing rust and corrosion
- Penetrating seized parts and lubricating equipment for smoother operation
- Removing oil, grease and grime with ease
- Drying out electrical systems and improving electrical connections in damp environments
