Service Centre
for assistance**

Sixty years of engineering expertise, research and development along with high quality standards have made ProMinent a global market leader.

Offering 60 years of experience as a global leader in metering, water treatment and chemical fluid handling, ProMinent delivers the high engineering standards of a global market leader.

ProMinent offers its customers products, systems and maintenance support for applications such as metering fluids and solids, water disinfection and micro-pollution. Water treatment expertise extends to potable water, waste water, swimming pool water, cooling water, process and utility water.

The business' in-house engineering, research and development capability has seen ProMinent serve challenging industries such as chemical, oil and gas, hotel and leisure, beverage and public services. In all cases, ProMinent has built customer confidence due to its focus on process reliability and its localised services for customers of all sizes, sectors and locations.

The support of ProMinent product specialists combined with the technical resources of ERIKS offers end users an exceptional service for applications such as:

- Water treatment & disinfection
- Chemical fluid handling
- Environmental protection
- Fluid metering
- Oxidation systems
- Metering pumps
- Micro-pollution removal
- Legionella control
- Turnkey and bespoke projects
- CIP - clean-in-place

ERIKS

NEW PROMINENT PRODUCTS FOR YOU

Beta Dosing Pump

Capacity range 0.74 – 32 l/h, 25 – 2 bar

All-purpose solenoid metering pump for the metering of liquid media in water treatment and chemical processes: Solenoid-driven metering pump Beta®. Cost-effective, overload-proof, adaptable to signal transducers fitted.

Gamma X Dosing Pump

Capacity range 2.3 – 45 l/h, 25 – 2 bar

Discover a metering pump that sets new standards in productivity, Reliability and cost-effectiveness. The gamma/ X is user-friendly and has an outstandingly long service life, just like its predecessor. An ingenious solenoid control measures the back pressure and protects the system from overload.

DSUa Molded Skid Package

Modular metering system with 1 or 2 pumps and 1 or 2 metering points.

Capacity range of 10 ml/h to 75 l/h with 10 to 2 bar

Counter-pressure.

Reliable and affordable thanks to standardised components.

Flexible fitting to your application, also as retrofit.

Ready-to-install system with a lead time of just 15-20 days

Sigma Microprocessor Motor Driven Pump

Sigma 1: Capacity range 17 – 117 l/h, 12 – 4 bar

Sigma 2: Capacity range S2Cb: 61 – 353 l/h, 16 – 4 bar

Sigma 3: Capacity range 182 – 1,040 l/h, 12 – 4 bar

Detachable operating unit with large illuminated LC display for outstanding user convenience, Metering profiles for optimum metering results.

The entire Sigma product range is available as standard in a "Physiologically safe in respect of wetted materials" design and

with electro-polished stainless steel dosing head and EHEDG certification for applications with strict hygiene requirements. Please contact Prominent for more details on this series of pumps.

Gamma XL Dosing Pump

Capacity range 8 – 80 l/h, 25 – 2 bar

Simple adjustment of the capacity directly in l/h or in gph, integrated pressure measurement and display for greater safety during commissioning and in the process, Bluetooth and Wi-Fi connection for the simple configuration and call-up of process data (optional). Capacity adjustment range 1:40,000

Direct input of the required final concentration with volume-proportional metering tasks in concentration Mode. Virtually wear-free solenoid drive, overload-proof and economical.
