

Stay on track with  
**Advanced**  
Service Level Protection

The Advanced service level protection enables you to stay ahead of potential equipment failures collecting real-time data from a custom-installed sensor network. This data is analysed by the innovative ERIKS dashboard, designed for integration and ease of use.

With the Advanced level protection, you gain from high-quality, dense data that provides deep insights into machine health, analysed and presented in a simple informative way to enable you to take timely actions. Whether online or offline, this data helps you monitor equipment conditions and implement early preventative measures to maximise productivity and minimise downtime.

**Tailored Sensor Network.** ERIKS offers a flexible range of sensors that can be configured to fit your specific assets, providing the earliest, most accurate fault detection to keep operations running smoothly.

**Powerful Reliability Dashboard.** The smart algorithms within our user-friendly dashboard quickly identify potential issues, guiding you through the causes and solutions. For advanced users, detailed analytics are available to support deeper investigations.

**Simple intuitive system with everything you need to support your engineering team on their journey to reliability**

- From 20 sensors minimum, 3 year contract
- Powered by ERIKS innovative SAM dashboard
- Sensor system supplied by ERIKS, installed by customer
- Algorithmic data analysis and actionable insights
- Data collection frequency from every hour
- Documentation management capabilities
- Three 1-hour onboarding and training sessions

Let's make industry work better

# ERIKS SAM Reliability Platform: Powering Manufacturing Excellence

Experience the future of condition monitoring with the ERIKS Reliability Platform, a cloud-based tool featuring sophisticated analytics and an award-winning dashboard, the platform offers:

- **Algorithmic Data Analysis:** Harness powerful data engines, ensuring precise insights.
- **Live Status Monitoring:** Stay informed with real-time updates on equipment conditions.
- **Condition Scores:** Understand equipment health at a glance with intuitive 1 to 10 condition scores and colour coding.
- **Smart Maintenance Alerts:** Receive timely alerts for proactive maintenance.
- **Diagnosis and Suggested Actions:** Benefit from smart algorithms that provide potential causes and actionable solutions.
- **Central Repository:** A digital register for all assets, with a history and certification repository for streamlined documentation.

Designed to be simple and intuitive, whether online or offline, the ERIKS SAM Platform empowers you to take smart, actionable insights to optimise performance and minimise downtime.

Call 0121 508 6000 or visit [www.eriks.co.uk](http://www.eriks.co.uk)

Available 24 hours a day, 365 days a year for emergency service.
